Tom –

It has been awhile, but I wanted to touch base and follow up with you regarding the earlier Hinckley issue you raised to our office.

Ex. 7(e)

Ex. 7(e)

The information that was left and sent to our Los Angeles Office as noted below was sent on to Bruce Macler, Toxicologist in our Drinking Water Office by Superfund Division's Carlin Hafiz for his review. Bruce has told me that based on his review of the materials in the submittals, he does not see any role or follow up action for EPA needed at this time based on his review of the information submittals.

Tom –

Thanks for the additional follow up information you sent our way on the Hinckley well

contamination issue. I will check in with Bruce Macler and Corine Li of our Drinking Water Office next week when I am back in the office and following their review, will follow up with you to see if we can set up a call to share our perspectives on this issue.

Tom –

As a follow up to your interest in the Region's perspective on the chromium and non-chromium/other constituent contamination in residential wells in Hinckley, CA, I reached out to the manager of our Drinking Water office and she suggested that our Drinking Water Toxicologist, Bruce Macler, would be a good person for us to have on a follow up call to discuss. Bruce has let me know that he would be available for a conference call on Friday, July 17th. Please let me know if you would have some time available for a call. Once a call is confirmed, I can provide a call-in number and access code. We look forward to talking with you.

Hi Brent,

I am looping you and Tom Fox, Senator Boxer's senior counsel on SEPW Committee, together. Tom is looking for the region's perspective on the chromium and non-chromium/other constituent contamination in residential wells. Tom is cc'd and his number is 202-224-1373. Let

me know if I can be of further assistance.
